

TÓTH MÁRK ZOLTÁN

SENIOR FULLSTACK DEVELOPER

PROFESSIONAL PROFILE

As a fullstack developer I am capable of implementing fullstack web applications, however on the UI side I tend to help myself with already existing component & CSS libraries. In other words, I am more lenient to the backend side.

WORK EXPERIENCE

2024 APR
PRESENT

SENIOR SOFTWARE DEVELOPER

GE HEALTHCARE

My tasks have consisted of:

- Designing & developing features & bugfixes for a client-side SDK responsible for loading and grouping DICOM images. This SDK was used by internal consumers, mainly browser-based DICOM image viewer applications.
- Designing & implementing a server-side application providing a REST API based on aforementioned SDK for consumers who do not want to at this SDK to their application as a dependency directly. The other main goal of this API was to significantly simplify the existing API, which was quite cumbersome if one did not use the SDK. With this new API consumers can replace 4-6 HTTP calls and the management of a WebSocket connection with 1 single HTTP call. Greenfield project.
- Maintaining Helm chart for Kubernetes deployments
- Implementing a custom streaming solution & research potential application of HTTP2
- Performance profiling. The server-side API had to ensure that the first frame loads under 1 second.

2021 JUN
2024 FEB

FULLSTACK DEVELOPER / TEAM LEAD

XUND SOLUTIONS

My tasks have consisted of:

- Designing & developing features & bugfixes for different microservices, one of which was a CLASS-2 medical device certified REST API
- Implementing FHIR/HL7 standards compliant REST API
- Designing & implementing features for internal admin dashboards based on Ant Design, React & Next.js.
- Leading scrum ceremonies, leading & documenting releases.

2020 SEP
2021 JUN

TEACHER OF WEB DEVELOPMENT

BGSZC SZASZ FERENC COMMERCIAL TECHNICAL SCHOOL

Held web development courses covering: Javascript language, MVC & RESTful architecture, Node.js & Express, React & Redux.

2019 SEP
2021 JUN

TEACHER OF IT

BMSZC PETRIK LAJOS BILINGUAL TECHNICAL SCHOOL

Teaching foundational IT concepts, programming basics, and technical English to bilingual students.

2017 SEP
2019 AUG

PROGRAMMING TUTOR

LOGISCHOOL UJBUDA - ICREATIVE KFT.

Mentoring young students in programming fundamentals and logic.
